Faculty Evaluation of Administrators 1998-1999

This issue is comprised of the quantitative results of the 14th annual Faculty Evaluation of Administrators. A committee of the Faculty Senate formulated the evaluation instrument. It was circulated to all regular faculty, including those designated in University College, Chairs/Directors, Associate Deans and Deans. Sheila Summers Thompson, Director of University Assessment, did the tabulation for the survey. The Executive Committee of the Faculty Senate decided by consensus that all information be provided to the faculty, but in such a manner as to preserve faculty anonymity.

Please note that the results of the survey are also provided on the Faculty Senate Website. Supplemental information, the mode and standard deviation of the results, is provided for questions that had 10 or more respondents. However, we have created this directory so that a password is needed for access. Go to:

In total, 472 surveys were distributed and 170 or more were returned for a minimum response rate of 36%. The responses are based on the following scale:

5 = excellent

4 = good

3 = average

2 = fair 4 = good
